Custom Rescue

A New Rescue Unit with the Quality and Dependability You'd Expect from Seagrave

The new Specialist Rescue carries on the Seagrave tradition of superior construction and high-performance design features. Body construction is offered in galvaneal or stainless steel. Compartments are spacious. And as with other Seagrave bodies, all available space is put to use for optimum storage capacity. From our custom chassis to our exclusive paint finish, the Specialist will never let you down.

Superior features and options combined with a tradition of quality construction

- Choice of custom Seagrave chassis
- Slide-out tool boards and roll-out trays
- Rooftop compartments with hinged covers
- Compartment doors available as hinged or roll-up
- All NFPA compliant
- Top-side telescoping light tower options
- Maximized compartment space
- Formed construction for increased strength
- Single source manufacturer

The Specialist™

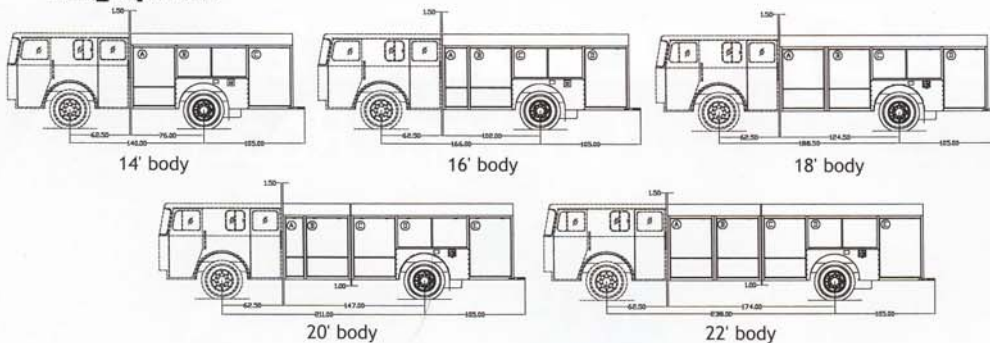

Custom Rescue

Features and Specifications

The Seagrave Specialist™ gives you quality features and construction that allows you to respond with confidence. With so many features and options, you can specify a rescue unit tailored to your specific equipment and team needs. Some specifications are interrelated and too varied to present here in detail. Your Seagrave representative can help you clarify all your options and specifications. Please call them for a personal introduction.

Body Options

Construction

- 12 gauge galvaneal steel or stainless steel
- Structural steel body supports made of 3" x 4" angles welded to 3" x 7.1 lb channels
